# THE HIGHEST LEVEL OF PRECISION, EFFICIENCY AND ENERGY OPTIMIZATION.

Committed to become your world class partner, Bonfiglioli is a leading name in power transmission since 1956. Our best-in-class solutions are backed by nearly 60 years of engineering expertise as well as an in-depth understanding of the industries we serve.

High innovative mechatronic tailored solutions from unique supplier to meet any kind of specific needs.

Our solutions include precision planetary gearboxes, servomotors, servo inverters and regenerative inverters. An unique combination of mechatronic solutions plus a vast range of products for industry make Bonfiglioli a one-stop-shop for applications in many different sectors.

Our two centres of excellence, one in Italy and one in Germany, drive success in mechatronics by developing breakthrough innovations.

# MECHATRONIC SOLUTIONS FOR ALL INDUSTRIAL APPLICATIONS

Bonfiglioli is a leading drive and automation specialist in mechatronic applications. We are able to develop electronically orientated products as well as mechatronic and vertically integrated solutions with its mechanical, electrical, electronic and applications competences, Bonfiglioli can assist you to design cost effective and energy efficient machines and installations, aligning their performance to precisely meet your needs.

# MECHATRONICS - THE CHALLENGE TO BUILD YOUR SUCCESS

## **Faster, better and cheaper - this is the new challenge for machine designers!**

Increasing demands on the productivity of complex system machines, more flexible machines which run at highest efficiency level are requiring now new intelligent technical solutions that enhance growth tomorrow.

Bonfiglioli has implemented a precise and detailed strategy to precisely achieve this objective!

Bonfiglioli Mechatronic Drives & Solutions division is born with the mission to improve profitability by acting as a riskless partner and a provider of energy-efficient solutions over the total lifecycle in the field of industrial automation.

- System integration
- Expertise
- Energy saving

# OUR EXPERTISE FROM START TO FINISH!

Two Centers of Excellence are driving MDS' innovation:

- Bonfiglioli Vectron in Germany, with strong technical, R&D and manufacturing capabilities as regards electronic components, and most notably inverters and servo drives;
- BMR (Bonfiglioli Mechatronic Research), situated in Rovereto (Trento, Italy) who offers a strong R&D capability able to provide innovative new solutions for your specific needs. BMR is a production facility where mechatronic new solutions become reality.

Key to our MDS' success is strongest technical support from our specialists DSC (Drive Service Center team). They accompany you throughout the entire installation's lifecycle, from initial concept idea and design until commissioning.

**Bonfiglioli**  
is close to your needs internationally through its branches which can directly follow the customers using streamlined international teams.

# ONE STOP SHOP FOR YOUR MECHATRONIC APPLICATIONS

As a competent technology partner, our engineering specialist are **building together with you tailored and forward looking integrated solutions to meet the individual needs and to deliver mechatronic energy-efficient for your application.**

Bonfiglioli servopackage is including all the components required for a complete automation solution in one coordinating product package:

- HMI – Bonfiglioli Human Machine Interface
- Programmable inverter (ANG, ACU, AGL)
- Highly dynamic servomotors with various feedback devices BMD series
- Precision planetary gearboxes (TQ, TQF, TQK, TR, MP, LC, LCK, SL)
- Precision bevel gearboxes (KR)
- “Ready - to - use” accessories (cables, chokes, filters ecc)

**Benefits**

- Highest precision and dynamic
- Strong and compact
- Highest radial and axial load capacities
- Highest tilting stiffness
- Quiet operation

**Benefits**

- High precision & dynamic
- Frequent reverse cycle
- Highest power density

**Benefits**

- Energy saving
- Simplified system solution
- Wide constant torque
- Accurate torque and speed control
- Highest power density

**Complete automation Servo Package from unique supplier!**

## Focusing on the sizing service

Bonfiglioli is your partner assisting you in sizing, fine tuned optimization and selection of a drive train.

Our attention is focused in designing and manufacturing products for your motion requirements but we also have implemented servo tools that make your design process easier. We are able to optimize the servopackage avoiding oversizing that increases the initial system cost as well as the ongoing operating cost of a servo system.

Bonfiglioli optimizes efficiency of entire drive trains by a detailed analysis identifying and assessing potentials for energy saving.

# A RELIABLE PARTNER FOR YOUR BUSINESS

Bonfiglioli Riduttori brings decades of experience supporting customers across a broad spectrum of industry sectors.

Our industry expertise means we understand your applications: product and requirements must fit and form a solution that match to your application.

Our tailored-solutions always offer to you a complete approach.

## Some of the industrial sectors we serve:

- Machine tools
- Packaging & labeling
- Food, beverage & tobacco
- Glass working
- Robotics
- Automation storage
- Ceramic
- Electronics & electronic assembly
- Woodworking

**PACKAGING & LABELLING**

**FOOD, BEVERAGE & TOBACCO**

**WOODWORKING MACHINES**

**CERAMIC**

# SHARING THE VALUE OF OUR WORK WITH YOU

Our team is fully dedicated to continuous improvement in the fields of quality, safety and the environment, across the entire value chain, from the smallest supplier to the end customer.

Bonfiglioli management systems are certified to ISO 9001:2008, ISO 14001 and OHSAS 18001, while our products are covered by international certifications.

Product reliability, excellence, innovation make Bonfiglioli a preferred partner.

## SERVO GEARHEADS

Motion applications require the use of planetary gearboxes to adapt speeds and torques, while ensuring precision demanded by the application.

Bonfiglioli Riduttori has chosen to use planetary precision gearboxes with BMD range of permanent magnet synchronous motors.

These gearheads combined with powerful drive electronics are designed for servo applications requiring highest standards in terms of dynamics, precision, robustness, durability and long term operation.

An important requirement for automation applications is high torque capability in a compact and light package. This high torque density requirement (a high torque/volume or torque/weight ratio) is important for automation applications with changing high dynamic loads in order to avoid additional system inertia.

## 1 GENERAL INFORMATION

### 1.1 SYMBOLS, UNITS AND DEFINITIONS

#### Values depending on the APPLICATION

term	u.m.	definition
$A_2$	[N]	Axial force on output shaft
$A_2$ EQU	[N]	Equivalent axial force applying on output shaft
$A_2$ MAX	[N]	Maximum axial force applying on output shaft
$R_2$	[N]	Radial force on output shaft
$R_2$ EQU	[N]	Equivalent radial force applying on output shaft
$R_2$ MAX	[N]	Maximum radial force applying on output shaft
ED	[s]	Duration of the duty (without brake)
ED%	[%]	Cyclic duration factor
$L_{10h}$ TARGET	[h]	Output shaft bearings' desired basic rating life
$M_1$ PEAK	[Nm]	Maximum input torque (limited by motor control)
$M_{2(1)} \dots M_{2(n)}$	[Nm]	Output torque at the times $t_1 \dots t_n$
$M_2$ EQU	[Nm]	Equivalent output torque
$M_2$ MAX	[Nm]	Maximum output torque in case of emergency
$M_{T2}$ EQU	[Nm]	Equivalent tilting moment applying on output shaft
$M_{T2}$ MAX	[Nm]	Maximum permissible tilting moment applying on output shaft
$n_1$	[min <sup>-1</sup> ]	Nominal input speed
$n_2$	[min <sup>-1</sup> ]	Output speed
$n_{2(1)} \dots n_{2(n)}$	[min <sup>-1</sup> ]	Output speed based on the times $t_1 \dots t_n$
$n_2$ EQU	[min <sup>-1</sup> ]	Equivalent output speed
$n_2$ MAX	[min <sup>-1</sup> ]	Maximum output speed
T	[C°]	Ambient temperature
$t_1 \dots t_n$	[s]	Operating time
$t_{\Sigma}$	[s]	Cycle duration including pause
Z	[1/h]	Number of cycles per hour

### Values depending on the GEAR DRIVE SELECTION

term	u.m.	definition
$A_{2/3 \max}$	[N]	Admissible axial force on output shaft
$A_{2/3' \max}$	[N]	Axial force acting simultaneously with radial force
$R_{1 \max}$	[N]	Admissible radial force at midpoint of input shaft
$R_{2/3 \max}$	[N]	Admissible radial force at midpoint of output shaft
$C_B$	[Nm]	Constant for bearing's lifetime calculation
$C_t$	$\left[ \frac{\text{Nm}}{\text{arcmin}} \right]$	Torsional stiffness
$f$	—	Factor ratio between axial and radial force
$f_n$	—	Speed factor
$f_z$	—	Cycle factor
$f_T$	—	Temperature adjusting factor
$i$	—	Gearbox ratio
$J_G$	[kgcm <sup>2</sup> ]	Mass moment of inertia of the gearhead
$K_n$	—	Speed constant
$L_{10h}$	[h]	Bearings basic rating life
$L_z$	[mm]	Factor for bearing lifetime calculation
$M_{a 2}$	[Nm]	Maximum acceleration output torque
$M_{n 2}$	[Nm]	Rated output torque
$M_{p 2}$	[Nm]	Emergency stop output torque. Permitted 1000 times during service life of the gearbox
$M_{T2 \max}$	[Nm]	Maximum tilting moment applying on output shaft
$n_{1 \max}$	[min <sup>-1</sup> ]	Maximum momentary input speed. The speed the unit can be driven at occasionally and in non-repetitive conditions For duty type S5, it cannot be applied continuously for more than 30 seconds
$p$	—	Bearing lifetime exponent
$\eta$	[%]	Gear efficiency
$\varphi_R$	[arcmin]	Reduced backlash is calculated in static conditions and with the application of a torque equal to 2% of the gear unit rated torque
$\varphi_S$	[arcmin]	Standard backlash is calculated in static conditions and with the application of a torque equal to 2% of the gear unit rated torque

## 1.2 SELECTING THE GEAR UNIT

(a)	Ratio	$i$	—	$i = \frac{n_1}{n_2}$
(b)	Equivalent output torque	$M_{2\text{ EQU}}$	[Nm]	$M_{2\text{ EQU}} = \sqrt[3]{\frac{ n_{2(1)}  \cdot t_1 \cdot  M_{2(1)} ^3 + \dots +  n_{2(n)}  \cdot t_n \cdot  M_{2(n)} ^3}{ n_{2(1)}  \cdot t_1 + \dots +  n_{2(n)}  \cdot t_n}}$
(c)	Equivalent output speed	$n_{2\text{ EQU}}$	[min <sup>-1</sup> ]	$n_{2\text{ EQU}} = \frac{ n_{2(1)}  \cdot t_1 +  n_{2(2)}  \cdot t_2 + \dots +  n_{2(n)}  \cdot t_n}{t_\Sigma}$
(d)	Speed factor	$f_n$	—	<p>If <math>\frac{K_n}{n_{2\text{ EQU}} \cdot i} \geq 1 \Rightarrow f_n = 1</math></p> <p>If <math>\frac{K_n}{n_{2\text{ EQU}} \cdot i} &lt; 1 \Rightarrow f_n = \text{Obtain from diagram}</math></p>
(e)	Temperature adjusting factor	$f_T$	—	
(f)	Cyclic duration factor	ED%	[%]	$ED\% = \frac{ED}{t_\Sigma} \cdot 100$
	Duration of the duty	ED	[s]	$ED = t_1 + t_2 + \dots + t_n$
(g)	Number of cycles per hour	Z	[1/h]	$Z = \frac{3600}{t_\Sigma}$
(h)	Cycle factor*	$f_z$	—	<p>*For Z&gt;6000 please contact us!</p>
(i)	Maximum input torque	$M_{1\text{ PEAK}}$	[Nm]	<p>a) maximum possible application torque</p> <p>b) limited motor torque by inverter</p> <p>c) maximum motor torque</p>

**Load diagram**

—  $M_2$ : Output torque

**Speed diagram**

—  $n_2$ : Output speed

### 1.3 SERVICE LIFE OF BEARINGS

(a)	Maximum radial force applying on output shaft Maximum axial force applying on output shaft	$R_{2\text{ MAX}}$ $A_{2\text{ MAX}}$	[N] [N]	Please consider the specific conditions (e.g. belt drives under acceleration torque)
(b)	Maximum tilting moment applying on output shaft	$M_{T2\text{ MAX}}$	[Nm]	$M_{T2\text{ MAX}} = \frac{R_{2\text{ MAX}} \cdot (x + L_z) \pm A_{2\text{ MAX}} \cdot y}{1000}$
(c)	Equivalent forces applying on output shaft	$R_{2\text{ EQU}}$ $A_{2\text{ EQU}}$	[N] [N]	$R_{2\text{ EQU}} = \sqrt[3]{\frac{ n_{2(1)}  \cdot t_1 \cdot  R_{2(1)} ^3 + \dots +  n_{2(n)}  \cdot t_n \cdot  R_{2(n)} ^3}{ n_{2(1)}  \cdot t_1 + \dots +  n_{2(n)}  \cdot t_n}}$ $A_{2\text{ EQU}} = \sqrt[3]{\frac{ n_{2(1)}  \cdot t_1 \cdot  A_{2(1)} ^3 + \dots +  n_{2(n)}  \cdot t_n \cdot  A_{2(n)} ^3}{ n_{2(1)}  \cdot t_1 + \dots +  n_{2(n)}  \cdot t_n}}$
(d)	Equivalent tilting moment applying on output shaft	$M_{T2\text{ EQU}}$	[Nm]	$M_{T2\text{ EQU}} = \frac{R_{2\text{ EQU}} \cdot (x + L_z) + A_{2\text{ EQU}} \cdot y}{1000}$
(e)	Equivalent output speed	$n_{2\text{ EQU}}$	[min <sup>-1</sup> ]	$n_{2\text{ EQU}} = \frac{ n_{2(1)}  \cdot t_1 +  n_{2(2)}  \cdot t_2 + \dots +  n_{2(n)}  \cdot t_n}{t_1 + t_2 + \dots + t_n}$
(f)	Bearings' basic rating life	$L_{10h}$	[h]	$L_{10h} = \frac{16666}{n_{2\text{ EQU}}} \cdot \left( \frac{C_B}{M_{T2\text{ EQU}}} \right)^p$

# TQ

## PLANETARY PRECISION INLINE GEARBOX

TQ

TQ features a higher positioning. Whether torque, robustness, or precision - this attractive product range scores in every category.

### Product Line Up:

- Outstanding Torque Density
- Outstanding Acceleration and Nominal Torques
- Outstanding Radial and Axial Load Capacities
- Designed for Cyclic and Continuous Duty
- Markedly high Torsional Stiffness
- Geometrical Backlash less than 2 arcmin
- Quiet Running
- Universal Design allows any Mounting Orientation

## 2 FEATURES OF TQ SERIES

TQ

Low backlash planetary drives of TQ series combine outstanding performances with a distinctive Italian style which makes them immediately recognizable amongst similar products within the reference industry.

Their design and construction has been developed with the goal of offering consumers a line of products which feature absolute and consistent Quality, which in turn provides a competitive advantage for machines and systems that adopt them as transmission devices.

- TQ features two classes of precision, corresponding to the following values of circumferential backlash  
 1-stage units: standard  $\varphi_S \leq 3'$  reduced  $\varphi_R \leq 2'$  ( $\varphi_S \leq 4'$ ;  $\varphi_R \leq 2'$  for TQ 060 and TQ 070)  
 2-stage units: standard  $\varphi_S \leq 5'$  reduced  $\varphi_R \leq 3'$  ( $\varphi_S \leq 6'$ ;  $\varphi_R \leq 4'$  for TQ 060 and TQ 070)
- A high IP rating (IP65) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level  $60 \leq L_p \leq 70$  dB(A). Conditions: distance 1 m ; measured without load and an input speed of  $n_1 = 3000 \text{ min}^{-1}$ ;  $i = 10$ .
- Numerous adapters allow matching the most popular brands of servomotors.
- Lubrication optimized for the type of duty specified when ordering.  
 In the absence of contamination the lubricant requires no periodical changes.

duty	TQ 060 ... TQ 160	other seals
<b>S1</b> (continuous)	Synthetic oil viscosity ISO VG 220	Fluoroelastomer
<b>S5</b> (intermittent)	NLGI grease consistency 00	NBR

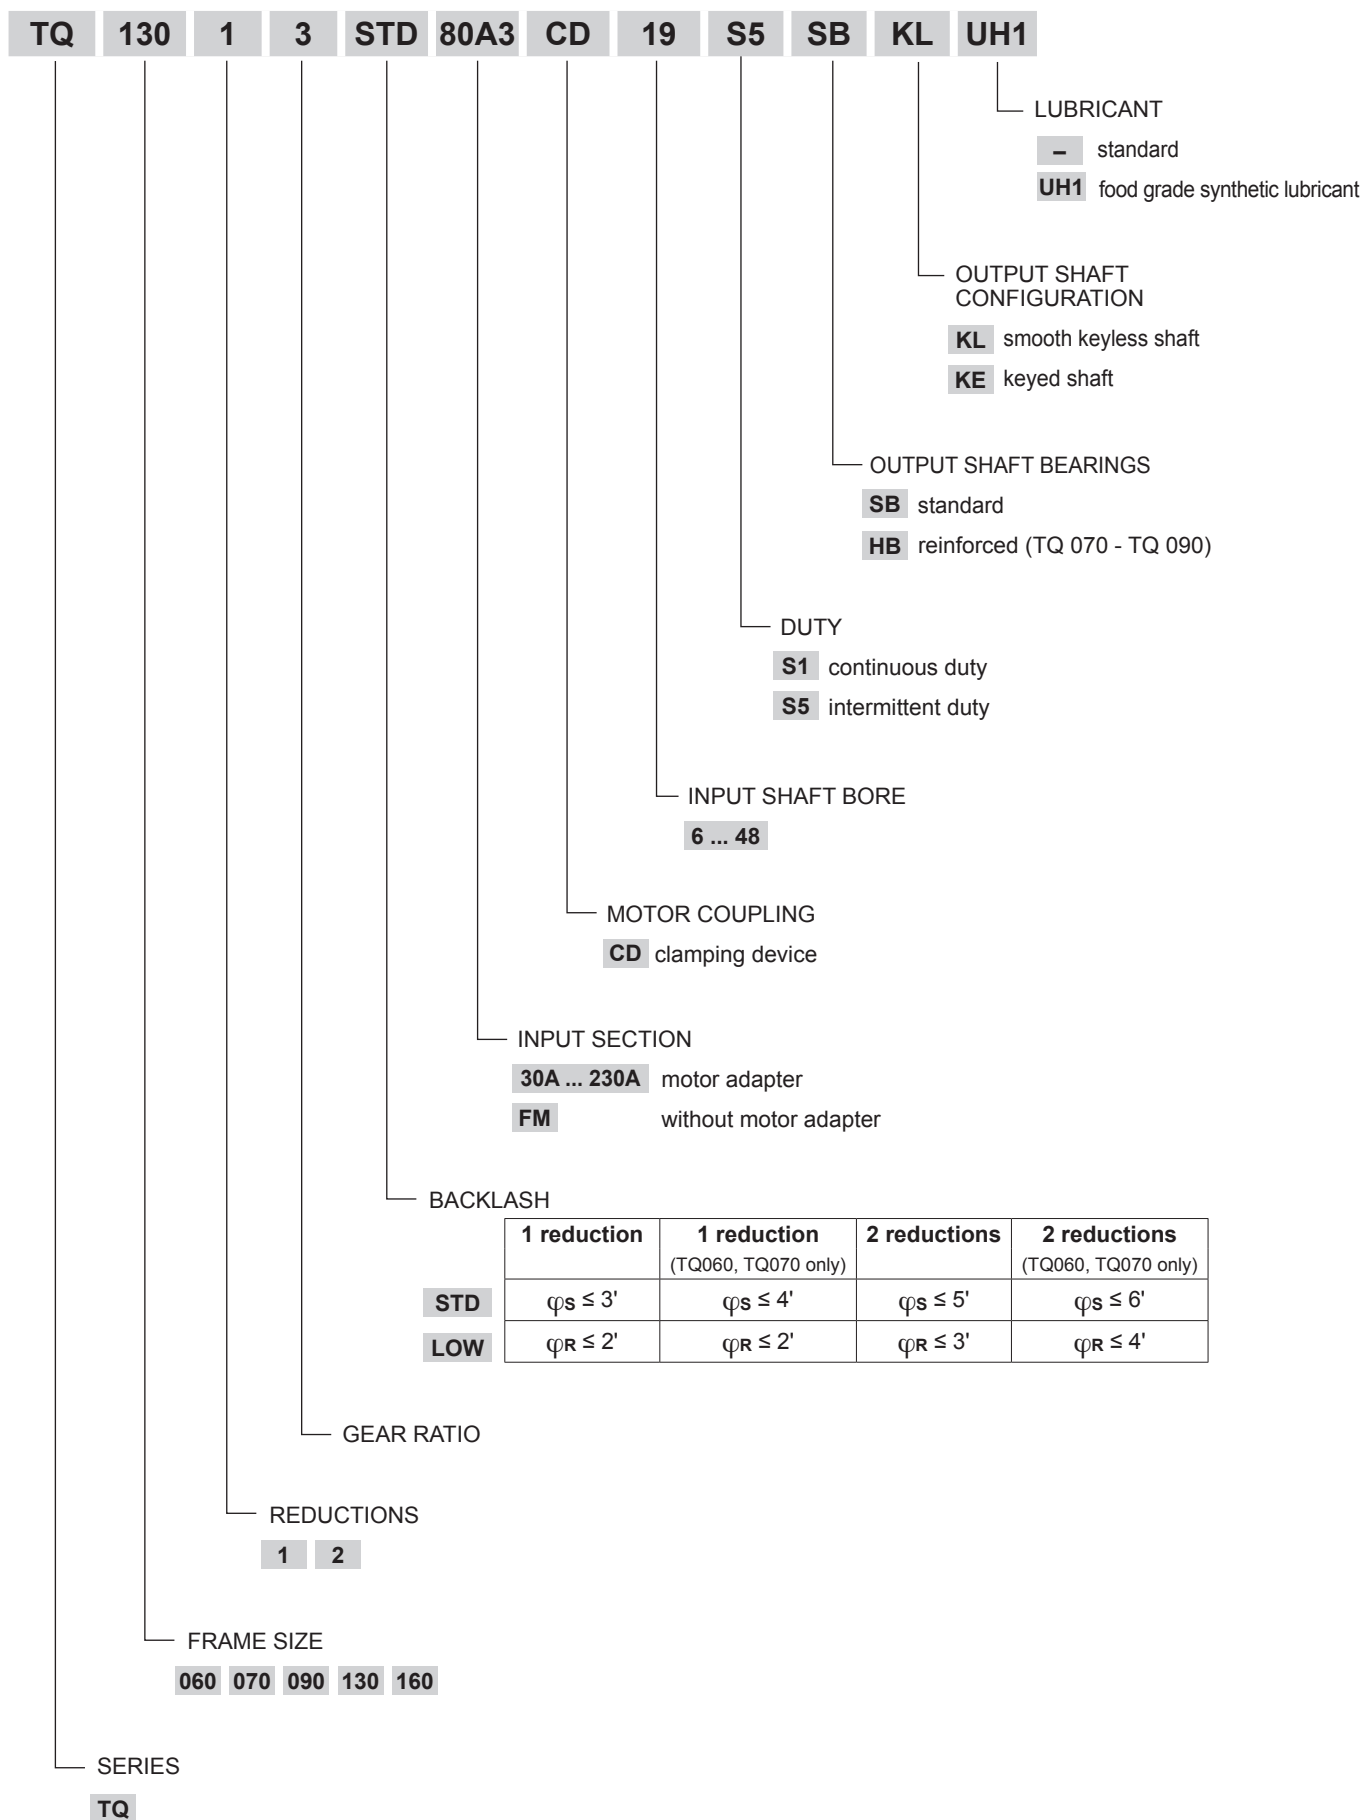

- Ambient temperature min  $-20^\circ\text{C}$ , max  $+30^\circ\text{C}$ . For temperature higher than  $30^\circ\text{C}$  please consider derating factor  $f_T$ .
- Housing temperature must not exceed  $T_{\text{max}} = 90^\circ\text{C}$ .

# New TQF

## PLANETARY PRECISION INLINE FLANGED GEARBOX

TQF features a higher positioning. This planetary gearbox is impressive in many aspects. Ideally suited for high positioning accuracy, highly dynamic cyclic operation and compact solutions.

TQF

### Product Line Up:

- Outstanding Torque Density with a compact design
- Outstanding Acceleration and Nominal Torques
- Highest Radial & Axial Load Capacities
- Highest Tilting Moment and Torsional Stiffness
- Geometrical backlash less than 3 arcmin
- Output flange similar to EN ISO 9409
- Designed for Cyclic and Continuous Duty
- Quiet running
- Universal Design allows any Mounting Orientation

### 3 FEATURES OF NEW TQF SERIES

Low backlash planetary drives of the TQF series feature a flange on the output shaft and are ideally suited for high positioning accuracy and highly dynamic cyclic operation.

Their design and construction has been developed with the goal of offering a line of product, which features exceptional performance, highest level of stiffness, low backlash and compactness.

TQF

- TQF features two classes of precision, corresponding to the following values of circumferential backlash  
 1-stage units: standard  $\varphi_S \leq 5'$  reduced  $\varphi_R \leq 3'$   
 2-stage units: standard  $\varphi_S \leq 7'$  reduced  $\varphi_R \leq 5'$
- A high IP rating (IP65) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level  $60 \leq L_p \leq 70$  dB(A). Conditions: distance 1 m ; measured without load and an input speed of  $n_1 = 3000$  min<sup>-1</sup>;  $i = 10$ .
- Numerous adapters allow matching the most popular brands of servomotors.
- Lubrication optimized for the type of duty specified when ordering.  
 In the absence of contamination the lubricant requires no periodical changes.

duty	TQF 060 ... TQF 160	other seals
<b>S1</b> (continuous)	Synthetic oil viscosity ISO VG 220	Fluoroelastomer
<b>S5</b> (intermittent)	NLGI grease consistency 00	NBR

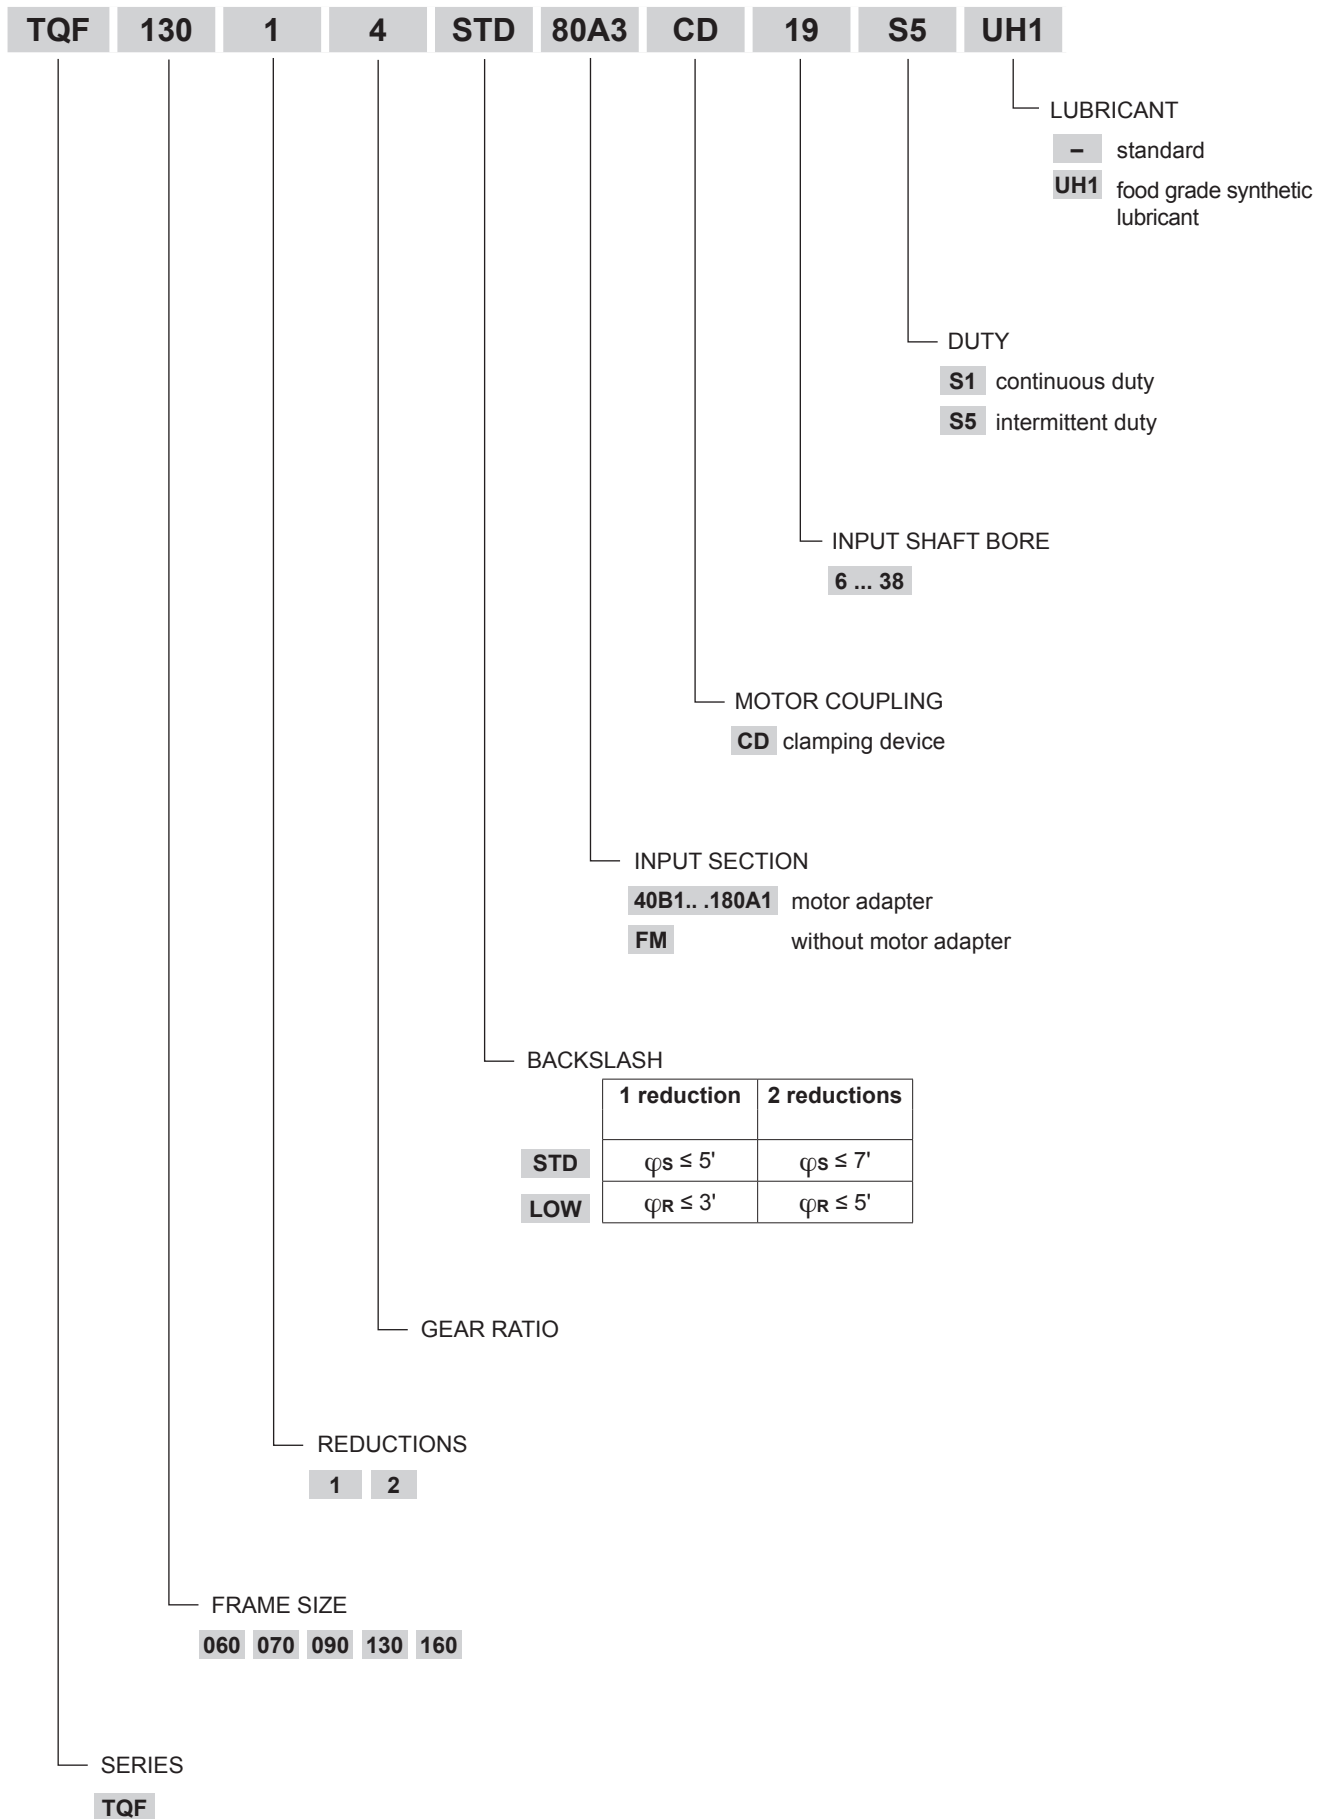

- Ambient temperature min -20°C, max +30°C. For temperature higher than 30°C please consider derating factor  $f_T$ .
- Housing temperature must not exceed  $T_{max} = 90^\circ\text{C}$ .

## PLANETARY PRECISION RIGHT ANGLE GEARBOX

TQK angular gearbox features a higher positioning like TQ inline serie.

This exceptional gearbox is the solution to space problems often posed by increasingly compact machines.

Whether torque, robustness, or precision - this attractive product range scores in every category.

TQK

### Product Line Up:

- Outstanding Torque Density
- Outstanding Acceleration and Nominal Torques
- Outstanding Radial and Axial Load Capacities
- Designed for Cyclic and Continuous Duty
- Markedly high Torsional Stiffness
- Geometrical Backlash less than 4 arcmin
- Quiet Running
- Universal Design allows any Mounting Orientation

## 4 FEATURES OF TQK SERIES

Low backlash bevel-planetary drives of the TQK series are the solution to space problems often posed by increasingly compact machines. TQK drives combine high levels of dynamic operation with top precision, which results in great accuracy and repeatability for any positioning mechanism in which they are installed.

On top of their robustness and dependability TQK drives also feature a distinctive Italian style that makes them clearly recognizable amongst like products within the reference industry.

- TQK features two classes of precision, corresponding to the following values of circumferential backlash  
2-stage units: standard  $\varphi_S \leq 5'$ ; reduced  $\varphi_R \leq 4'$  ( $\varphi_S \leq 6'$ ;  $\varphi_R \leq 5'$  for TQK 060 and TQK 070)  
3-stage units: standard  $\varphi_S \leq 7'$ ; reduced  $\varphi_R \leq 6'$  ( $\varphi_S \leq 8'$ ;  $\varphi_R \leq 7'$  for TQK 060 and TQK 070)
- A high IP rating (IP65) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level  $60 \leq L_p \leq 70$  dB(A). Conditions: distance 1 m ; measured without load and an input speed of  $n_1 = 3000 \text{ min}^{-1}$ ;  $i = 20$ .
- Numerous adapters allow matching the most popular brands of servomotors.
- Lubrication optimized for the type of duty specified when ordering, in the absence of contamination the lubricant requires no periodical changes.

duty	TQK 060 ... TQK 160	other seals
<b>S1</b> (continuous)	Synthetic oil viscosity ISO VG 220	Fluoroelastomer
<b>S5</b> (intermittent)	NLGI grease consistency 00	NBR

- Ambient temperature min  $-20^\circ\text{C}$ , max  $+30^\circ\text{C}$ . For temperature higher than  $30^\circ\text{C}$  please consider derating factor  $f_T$ .
- Housing temperature must not exceed  $T_{\text{max}} = 90^\circ\text{C}$ .

# TR PLANETARY PRECISION GEARBOX

TR planetary precision gearboxes are landmark for extremely reduced backlash, optimal performance, silent operation and facilitated motor assembly along with top reliability.

Available in different configuration (with input right angle; with output right angle and hollow shaft; with solid input shaft), and servo-adapters to comply with most servomotors mechanical interface from the market.

TR

### Product Line Up:

- Higher Torque Density
- Higher Acceleration and Nominal Torques
- Higher Radial and Axial Load Capacities
- Designed for Cyclic and Continuous Duty
- Higher Torsional Stiffness
- Higher Precision due to Geometrical Backlash less than 3 arcmin
- Quiet Running
- Highest Flexibility (Low / Reduced Backlash; Standard / Reinforced Bearings)
- Different Constructive Version to match with your Specific Requirement.

## 5 FEATURES OF TR SERIES

Planetary gear units of the TR series belong to a range of low backlash drives very broad and complete as far as transmissible torque, gear ratios and circumferential backlash.

All units are generously proportioned to run quietly and provide a long service life without maintenance requirements.

Motor mounting is an operation that can be easily conducted without the need of any particular tooling, other than that usually available in a normally equipped workshop.

- Available with either standard (STD) or reduced (LOW) backlash:
  - 1-stage units: standard  $\Psi_S \leq 5'$ ; reduced  $\Psi_R \leq 3'$
  - 2-stage units: standard  $\Psi_S \leq 5'$ ; reduced  $\Psi_R \leq 3'$
  - 3-stage units (G and MB only): standard  $\Psi_R \leq 5'$ ; reduced  $\Psi_R \leq 3'$
  - 3-stage units: standard  $\Psi_S \leq 7'$ ; reduced  $\Psi_R \leq 5'$
  - 4-stage units (G and MB only): standard  $\Psi_S \leq 7'$ ; reduced  $\Psi_R \leq 5'$
- A high IP rating (IP65) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level  $L_P \leq 70$  dB(A). Conditions: distance 1 m; measured without load an input speed of  $n_1 = 3000$  min<sup>-1</sup>;  $i=10$ .
- Bearings suitably rated for an average service life of 20,000 hours under nominal operating conditions. The following chart shows the types of bearings for the output shaft.

	TR 053	TR 060	TR 080	TR 105	TR 130	TR 160	TR 190
SB							

- Wide range of adapter flanges matching the most popular brands of motors.

- Lubrication optimized for the type of duty specified when ordering.  
In the absence of contamination the lubricant requires no periodical changes.

duty	TR 053 - TR 060	TR 080 ... TR 190	oil seals
<b>S1</b> (continuous)	NLGI grease consistency 00	Synthetic oil viscosity ISO VG 220	Fluoroelastomer
<b>S5</b> (intermittent)		NLGI grease consistency 00	NBR

- Ambient temperature min -20°C, max +30°C. For temperature higher than 30°C please consider derating factor fr.
- Housing temperature must not exceed  $T_{max} = 90^{\circ}C$ .

### 5.3.1 MACHINE SHAFT

Pivot of driven equipment should be made from high grade alloy steel. Table below shows recommended dimensions for the Customer to consider when designing mating shaft. A device retaining the shaft axially is also recommended (not shown). The number and size of relative tapped holes at shaft end depend on application requirements.

## PLANETARY PRECISION GEARBOX

MP planetary precision gearboxes are landmark for optimal performance, along with top reliability.

Available in different configuration (with input right angle; with output right angle; and hollow shaft, with solid input shaft), and servo-adapters to comply with most servomotors mechanical interface from the market.

MP

### Product Line Up:

- Higher Torque Density
- Higher Acceleration and Nominal Torques
- Higher Radial and Axial Load Capacities
- Designed for Cyclic and Continuous Duty
- Higher Torsional Stiffness
- Geometrical Backlash less than 10 arcmin
- Highest Flexibility (Low / Reduced Backlash; Standard / Reinforced Bearings)
- Different Constructive Version to match with your Specific Requirement.

## 6 FEATURES OF MP SERIES

Planetary gear units of the MP series belong to a range of low backlash drives very broad and complete as far as transmissible torque, gear ratios and circumferential backlash.

All units are generously proportioned to run quietly and provide a long service life without maintenance requirements.

Motor mounting is an operation that can be easily conducted without the need of any particular tooling, other than that usually available in a normally equipped workshop.

- Available with either standard (STD) or reduced (LOW) backlash:
  - 1-stage units: standard  $\Psi_S \leq 15'$ ; reduced  $\Psi_R \leq 10'$
  - 2-stage units: standard  $\Psi_S \leq 15'$ ; reduced  $\Psi_R \leq 10'$
  - 3-stage units (G and MB only): standard  $\Psi_R \leq 15'$ ; reduced  $\Psi_R \leq 10'$
  - 3-stage units: standard  $\Psi_S \leq 17'$ ; reduced  $\Psi_R \leq 12'$
  - 4-stage units (G and MB only): standard  $\Psi_S \leq 17'$ ; reduced  $\Psi_R \leq 12'$
- A high IP rating (IP65) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level  $L_P \leq 70$  dB(A). Conditions: distance 1 m; measured without load an input speed of  $n_1 = 3000 \text{ min}^{-1}$ ;  $i=10$ .
- Bearings suitably rated for an average service life of 20,000 hours under nominal operating conditions. The following chart shows the types of bearings for the output shaft.

	MP 053	MP 060	MP 080	MP 105	MP 130	MP 160	MP 190

MP

- Wide range of adapter flanges matching the most popular brands of motors.

- Lubrication optimized for the type of duty specified when ordering.  
In the absence of contamination the lubricant requires no periodical changes.

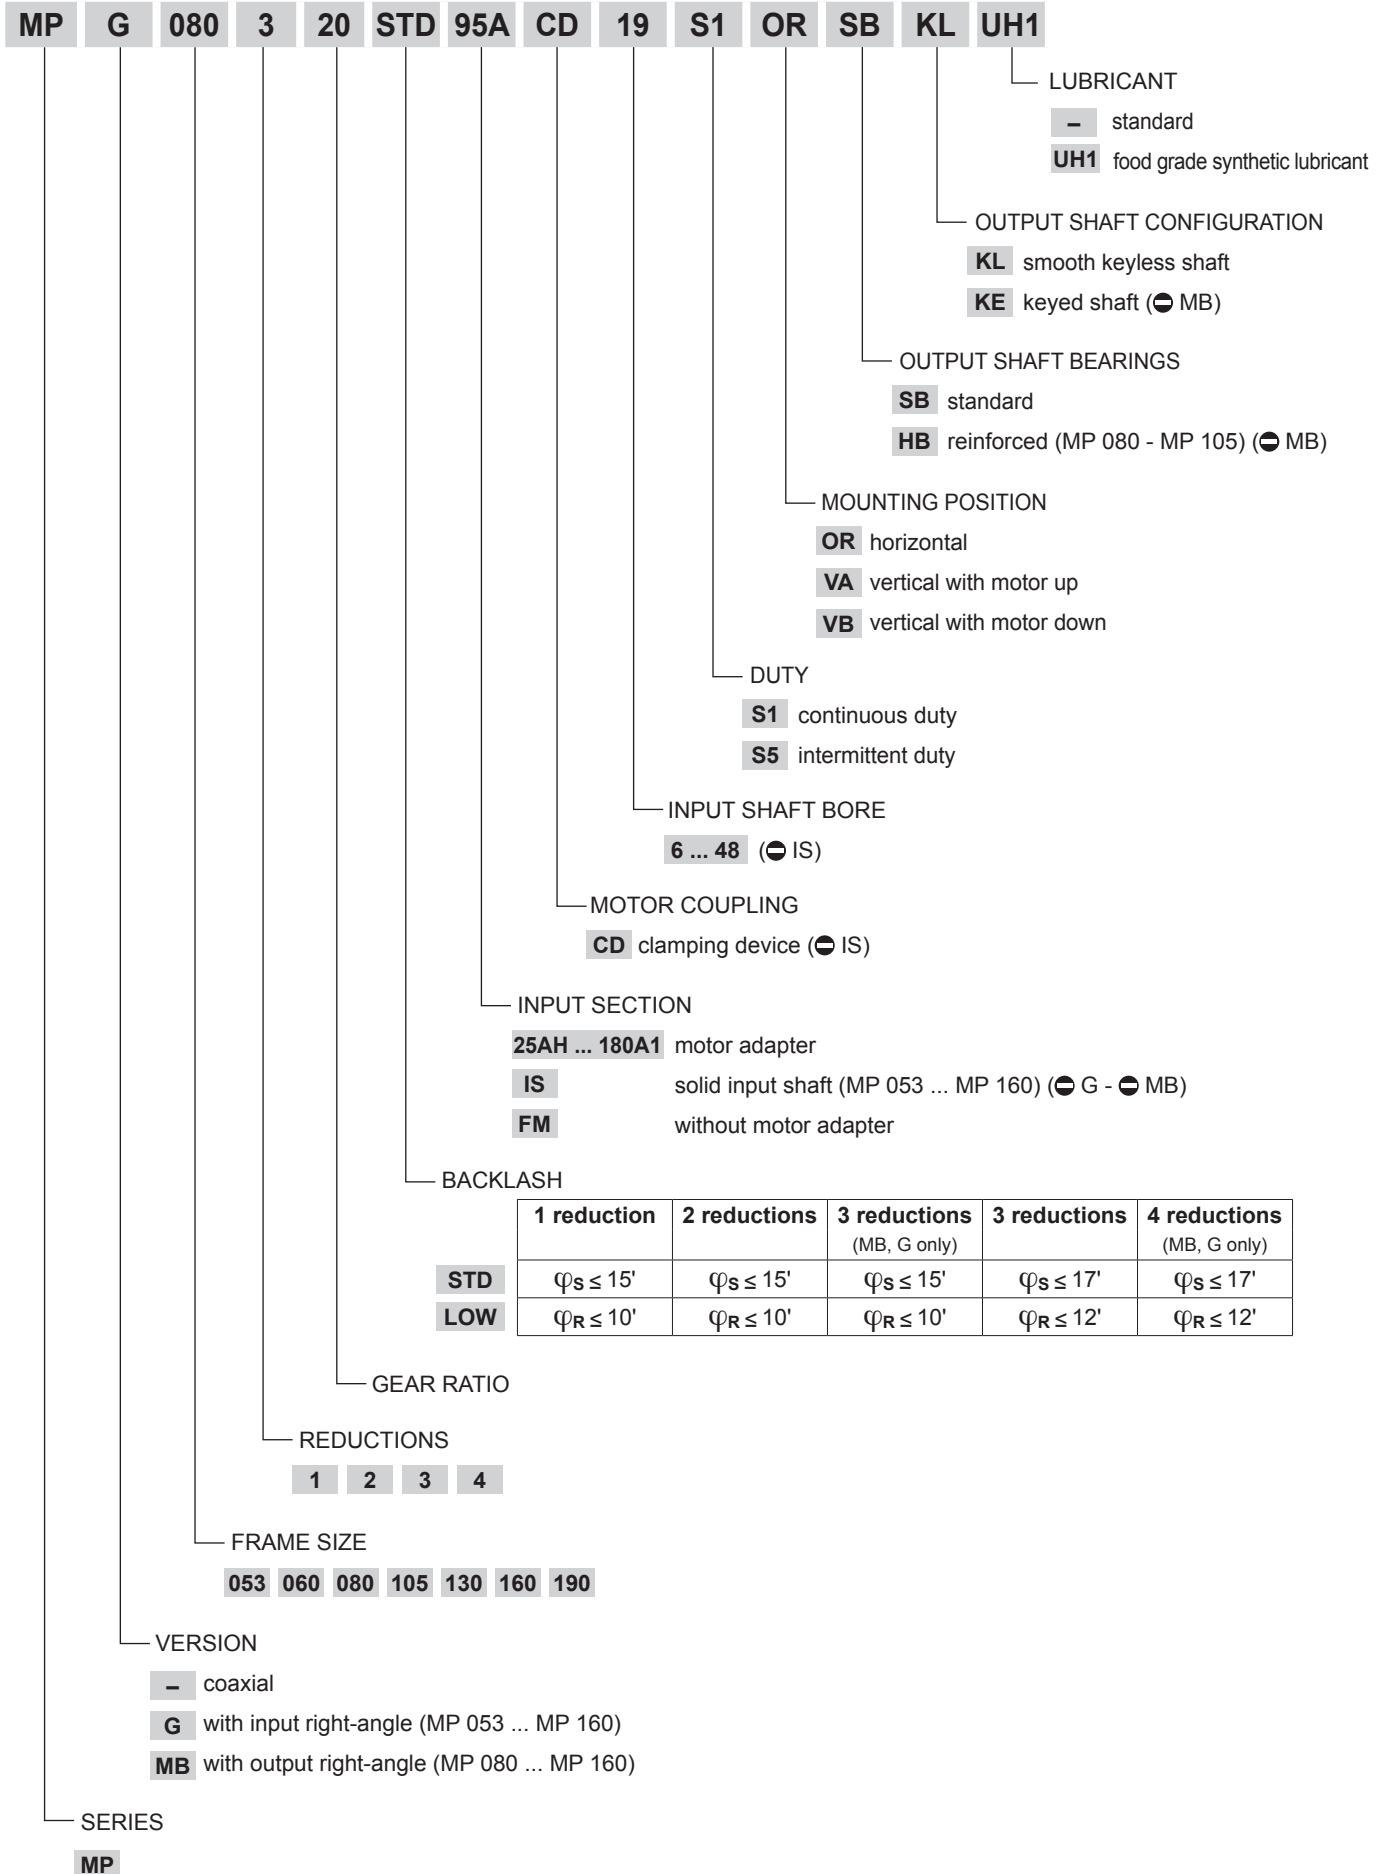

duty	MP 053 - MP 060	MP 080 ... MP 190	oil seals
S1 (continuous)	NLGI grease consistency 00	Synthetic oil viscosity ISO VG 220	Fluoroelastomer
S5 (intermittent)		NLGI grease consistency 00	NBR

- Ambient temperature min -20°C, max +30°C. For temperature higher than 30°C please consider derating factor  $f_T$ .
- Housing temperature must not exceed  $T_{max} = 90^\circ\text{C}$ .

### 6.3.1 MACHINE SHAFT

Pivot of driven equipment should be made from high grade alloy steel. Table below shows recommended dimensions for the Customer to consider when designing mating shaft. A device retaining the shaft axially is also recommended (not shown). The number and size of relative tapped holes at shaft end depend on application requirements.

# LC PLANETARY PRECISION GEARBOX IN LINE

LC planetary precision gearboxes represent a flexible solution, and economic alternative together with an optimal performance and reliability.

### Improved Performance as the key to downsizing

Enhanced performance of our LC precision gearbox (New "P" option) may open up important downsizing in many applications where previously was impossible to ensure a higher transmissible output torque.

As an additional benefit, downsizing lead to an improvement of energy efficiency by selecting a more compact gearbox with higher torque density and reducing significantly the acceleration mass.

Transmissible torque is now improved up to 40%.

LC

### Product Line Up:

- High Torque Density Option "P" available to extend Product Performance
- Optimal Acceleration and Nominal Torques
- Optimal Radial and Axial Load Capacities
- Designed for Cyclic and Continuous Duty
- Optimal Torsional Stiffness
- Geometrical Backlash less than 6 arcmin
- Universal Design allow any Mounting Orientation

## 7 FEATURES OF LC SERIES

Planetary gear units of the LC series belong to a range of low backlash drives very broad and complete as far as transmissible torque, gear ratios and circumferential backlash.

All units are generously proportioned to run quietly and provide a long service life without maintenance requirements.

Motor mounting is an operation that can be easily conducted without the need of any particular tooling, other than that usually available in a normally equipped workshop.

- Available with either standard (STD) or reduced (LOW) backlash:
  - 1-stage units: standard  $\varphi_S \leq 12'$ ; reduced  $\varphi_R \leq 6'$
  - 2-stage units: standard  $\varphi_S \leq 15'$ ; reduced  $\varphi_R \leq 8'$
- A high IP rating (IP64) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level  $L_P \leq 70$  dB(A). Conditions: distance 1 m; measured without load an input speed of  $n_1 = 3000 \text{ min}^{-1}$ ;  $i=10$ .
- Wide range of adapter flanges matching the most popular brands of motors
- Units are factory filled with synthetic grease to NLGI consistency class 00, in the absence of contamination the lubricant requires no periodical changes.
- Ambient temperature min  $-20^\circ\text{C}$ , max  $+30^\circ\text{C}$ . For temperature higher than  $30^\circ\text{C}$  please consider derating factor  $f_r$ .
- Housing temperature must not exceed  $T_{\text{max}} = 90^\circ\text{C}$ .
- Available as Version P with higher output Torque.

# LCK PLANETARY PRECISION RIGHT ANGLE GEARBOX

LCK replicate in the right angle layout excellent features already typical of the inline products LC series. Right angle layout is the solution to space problems often posed by increasingly compact machines.

This serie represent a flexible solution, and economic alternative together with an optimal performance and reliability.

### Improved Performance as the key to downsizing

Enhanced performance of our LCK precision gearbox (New "P" option) may open up important downsizing in many applications where previously was impossible to ensure a higher transmissible output torque. As an additional benefit, downsizing lead to an improvement of energy efficiency by selecting a more compact gearbox with higher torque density and reducing significantly the acceleration mass. Transmissible torque is now improved up to 40%.

LCK

### Product Line Up:

- High Torque Density Option "P" available to extend Product Performance
- Optimal Acceleration and Nominal Torques
- Optimal Radial and Axial Load Capacities
- Designed for Cyclic and Continuous Duty
- Optimal Torsional Stiffness
- Geometrical Backlash less than 6 arcmin
- Universal Design allow any Mounting Orientation

## 8 FEATURES OF LCK SERIES

Gear units of series LCK replicate in the right angle layout the brilliant features that are already typical of the in-line products of the LC series, with the additional benefit of a facilitated installation in tight spaces.

- Available in one only backlash option, corresponding to following values:  
2-stage units: standard  $\varphi_S \leq 6'$ ;  
3-stage units: standard  $\varphi_S \leq 8'$ ;
- A high IP rating (IP64) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level  $L_P \leq 70$  dB(A). Conditions: distance 1 m; measured without load an input speed of  $n_1 = 3000 \text{ min}^{-1}$ ;  $i=10$ .
- Wide range of adapter flanges matching the most popular brands of motors
- Units are factory filled with synthetic grease to NLGI consistency class 00, in the absence of contamination the lubricant requires no periodical changes.
- Ambient temperature min  $-20^\circ\text{C}$ , max  $+30^\circ\text{C}$ . For temperature higher than  $30^\circ\text{C}$  please consider derating factor  $f_T$ .
- Housing temperature must not exceed  $T_{\text{max}} = 90^\circ\text{C}$ .
- Available as Version P with higher output Torque.

# SL PLANETARY PRECISION GEARBOX FOR PULLEY DRIVES

SL - Planetary precision gearbox for pulley drives Series knows no rivals in compactness, efficiency and optimization for timing belt pulley drive systems.

This series is the ideal complement to conveyor belt servo-drives and all other applications needing to combine high precision with ultra-compact size.

### Improved Performance as the key to downsizing

Enhanced performance of our SL precision gearbox (New "P" option) may open up important downsizing in many applications where previously was impossible to ensure a higher transmissible output torque.

As an additional benefit, downsizing lead to an improvement of energy efficiency by selecting a more compact gearbox with higher torque density and reducing significantly the acceleration mass.

Transmissible torque is now improved up to 40%.

### Product Line Up:

- High Torque Density Option "P" available to extend Product Performance
- Higher Acceleration and Nominal Torques
- Higher Radial and Axial Load Capacities
- Designed for Cyclic and Continuous Duty
- Higher Torsional Stiffness
- Geometrical Backlash less than 6 arcmin
- Optionally available with a Timing Belt Pulley.
- Quiet Running
- Universal Design allow any Mounting Orientation

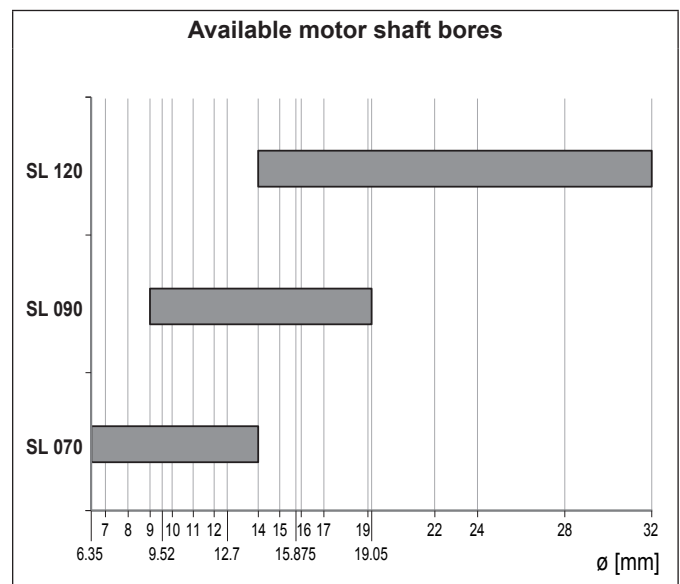

## 9 FEATURES OF SL SERIES

The SL Series from Tecnoingranaggi knows no rivals in compactness, efficiency and optimisation for timing belt pulley drive systems. Reduced backlash units from the SL Series are the ideal complement to conveyor belt servo-drives and all other applications needing to combine high precision with ultra-compact size.

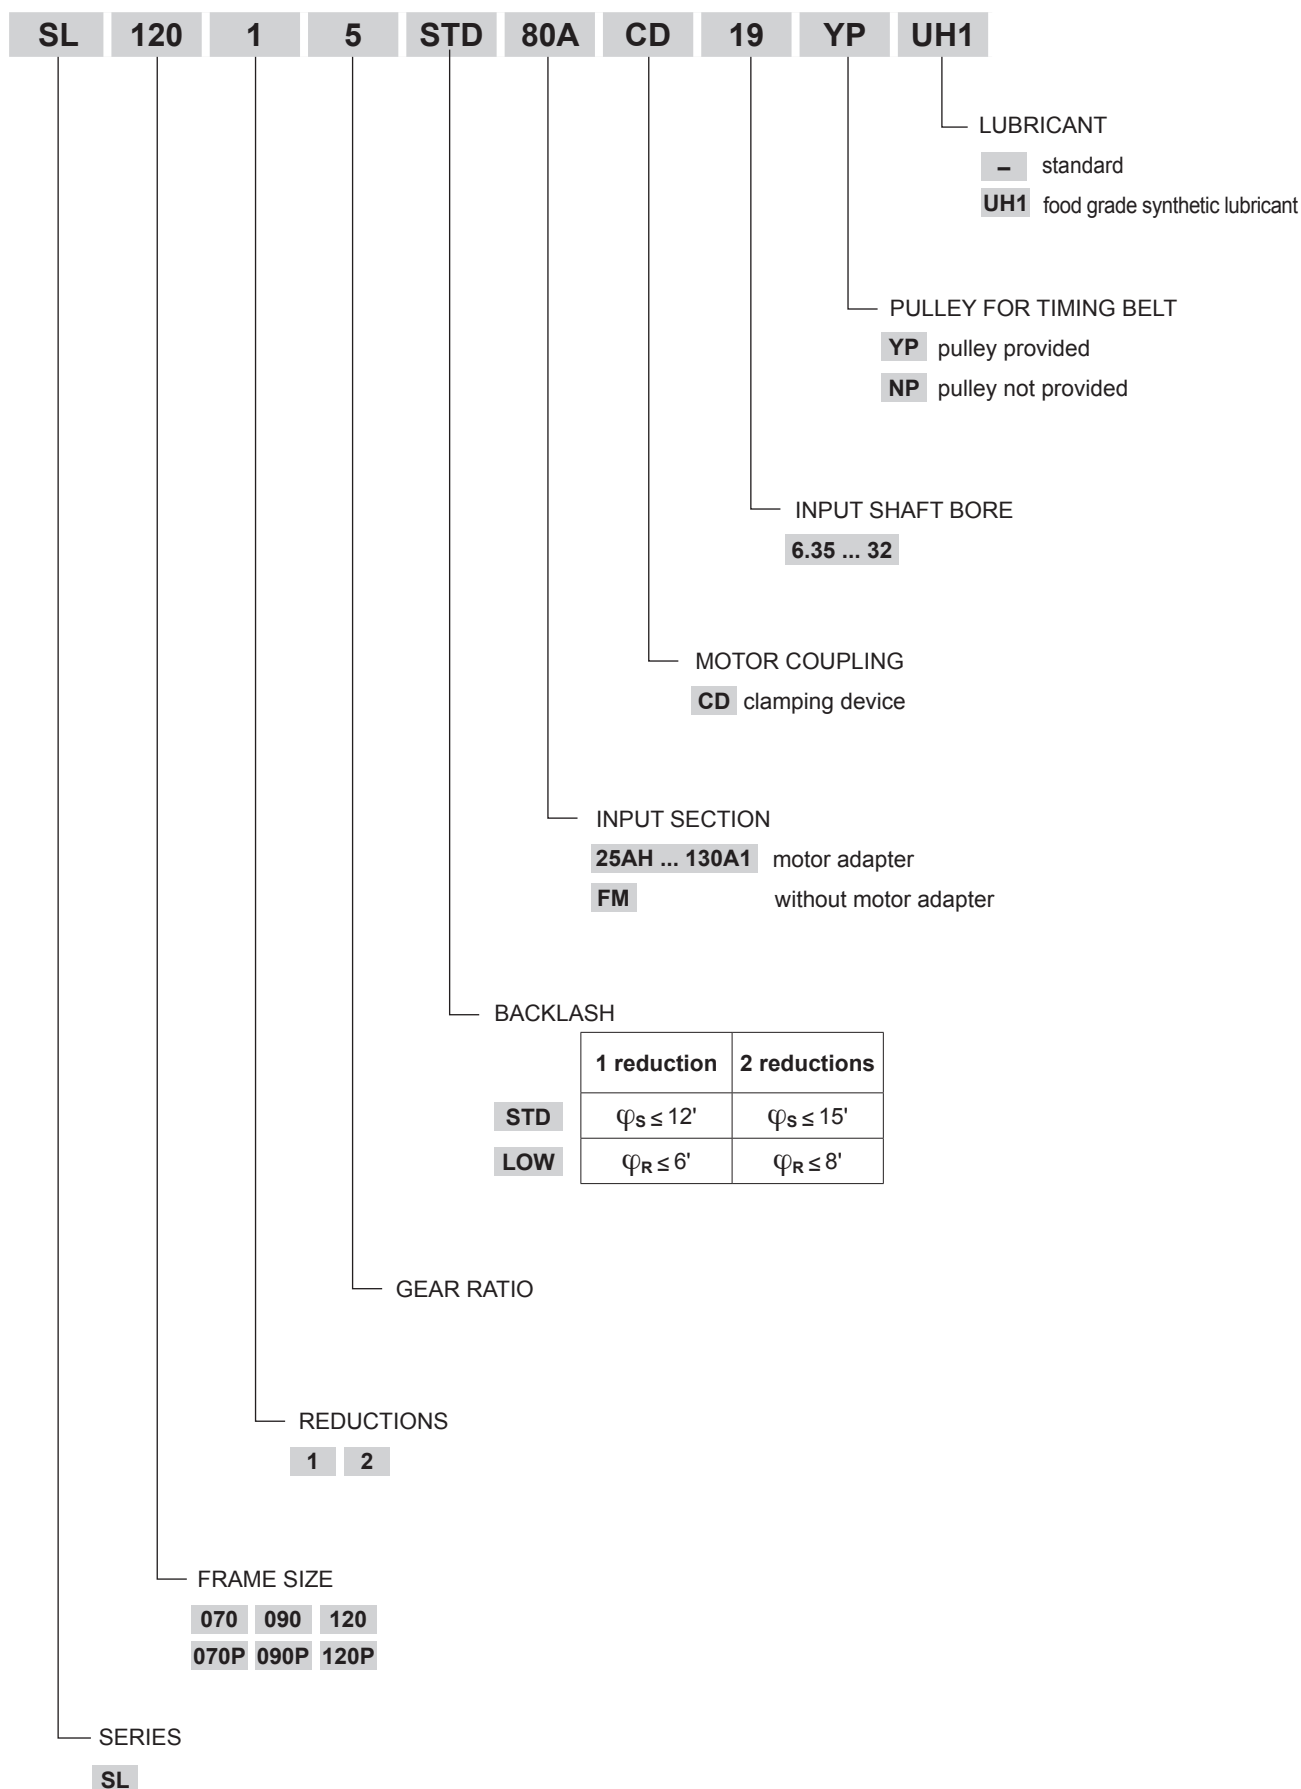

- Available with either standard (STD) or reduced (LOW) backlash:  
1-stage units: standard  $\varphi_S \leq 12'$ ; reduced  $\varphi_R \leq 6'$   
2-stage units: standard  $\varphi_S \leq 15'$ ; reduced  $\varphi_R \leq 8'$
- A high IP rating (IP64) provides inner parts with protection against the ingress of dust and liquids.
- Input section oil seals made from a Fluoroelastomer compound are supplied as standard.
- Noise pressure level  $L_P \leq 70$  dB(A). Conditions: distance 1 m; measured without load an input speed of  $n_1 = 3000$  min<sup>-1</sup>;  $i=10$ .
- Units are factory packed with synthetic grease to NLGI consistency class 00, in the absence of contamination the lubricant requires no periodical changes.
- Ambient temperature min -20°C, max +30°C. For temperature higher than 30°C please consider derating factor  $f_T$ .
- Housing temperature must not exceed  $T_{max} = 90^\circ\text{C}$ .
- Available as Version P with higher output Torque.

TS

# KR PRECISION BEVEL GEARBOX

The flexible, efficient economical solution to applications calling for space saving right angle drives with minimal backlash.

Available in different configurations with numerous input and output configuration.

## Product Line Up:

- Best Combination of Dynamics, Compactness and Precision
- Designed for Cyclic and Continuous Duty
- Good Torsional Stiffness
- Geometrical Backlash less than 8 arcmin

## 10 FEATURES OF KR SERIES

Bevel helical units type KR, manufactured under the most stringent quality specifications, are designed for dynamic and accurate applications where light weight and space effectiveness are a factor.

Many options can be selected from the catalogue as far as motor adapters and output shaft configurations that facilitate the installation on the driven equipment.

- Available in one only backlash option ( $\psi_s \leq 8'$ )
- Single reduction: ratios  $i = 1, 2, 5$
- Radial ball bearings (SB) are of standard supply, while taper roller bearings (HB) can be optionally specified for particularly demanding loading conditions
- Degree of protection IP65
- Oil seals from fluoroelastomer compound as standard
- Noise pressure level  $L_P \leq 70$  dB(A). Conditions: distance 1 m; measured without load an input speed of  $n_1 = 3000$  min<sup>-1</sup>
- Lubrication optimized for the type of duty specified when ordering, in the absence of contamination the lubricant requires no periodical changes.

duty	KR 010 ... KR 040
<b>S1</b> (continuous)	Synthetic oil viscosity ISO VG 220
<b>S5</b> (intermittent)	NLGI grease consistency 00

- Ambient temperature min -20°C, max +30°C. For temperature higher than 30°C please consider derating factor  $f_T$ .
- Housing temperature must not exceed  $T_{max} = 90^\circ\text{C}$ .

## 10.7.2 MACHINE SHAFT

Pivot of driven equipment should be made from high grade alloy steel. Table below shows recommended dimensions for the Customer to consider when designing mating shaft. A device retaining the shaft axially is also recommended (not shown). The number and size of relative tapped holes at shaft end depend on application requirements.

**H**

	A1	A2	A3	A4	B	B1	B2	C	D	E	R <sub>MAX</sub>	 UNI 6604	S
<b>KR 030</b>	≥ 26	18 h7	17	18 h7	129	18	90	32	2	2	0.5	6x6x25 A	1
<b>KR 040</b>	≥ 36	28 h7	27	28 h7	149	28	90	50	2	2	0.5	8x7x35 A	1

NB: The choice of driven shaft with a UNI 6604 key as described introduces increased backlash into the application compared to that achieved by a configuration with just the gearbox ( $\varphi_s \leq 8^\circ$ ).

**S**

	A1	A2	A3	A4	B	B1	B2	R <sub>MAX</sub>	S
<b>KR 010</b>	≥ 15	11 h7	9.5	10 h6	99	13	70	0.5	1
<b>KR 020</b>	≥ 20	16 h7	14.5	15 h6	122	18	83	0.2	
<b>KR 030</b>	≥ 30	22 h7	19.5	20 h6	149	23	100	0.5	
<b>KR 040</b>	≥ 40	32 h7	29.5	30 h6	173	33	104	0.5	

## INDEX OF REVISIONS

	TI_CAT_TIR_STD_ENG_R03_1
	Description
1...14	New introduction to product range.
...	Revised some technical data.

2017 11 10

This publication supersedes and replaces any previous edition and revision. We reserve the right to implement modifications without notice.  
This catalogue cannot be reproduced, even partially, without prior consent.

We have a relentless commitment to excellence, innovation and sustainability. Our team creates, distributes and services world-class power transmission and drive solutions to keep the world in motion.
